

The Highlight **FREEDOM™ 6500 AUTOMATIC**

The most advanced rotating arm automatic system available! Any load that can be conveyed can be easily and economically wrapped with the Freedom™ 6500 Automatic. Platform Automatic models are also available.

DUAL POWER HYDRO-STRETCH®

The most advanced film delivery system available! The stretch percentage is unlimited because it is not controlled by gears and pulleys. It offers precise control of the film stretch and film force. Any gauge or quality of film will perform better with **Dual Power Hydro-Stretch®**. Angled carriage wraps low to the conveyor so stretch film locks pallet and load together.

FILM JAWS hold film at beginning and end of cycle.

FILM CUT AND SEAL

The film is cut with a hot bar and the whale tail secures the film to the load.

TOUCH SCREEN CONTROLS

Setting wrap parameters and troubleshooting is easy using Highlight's touch screen controls.

RING GEAR DRIVE

Rugged ring gear insures long life and stability for high wrapping speeds.

STRUCTURAL FRAME

Frame is structural steel for stability at high speeds. Intelligent design makes installation easy.

FREE-STANDING NEMA-12 CONTROL PANEL

PHOTO EYES automatically stage and center loads.

HEAVY DUTY CONVEYORS

Highlight heavy duty conveyors are built for fast, smooth conveying and high production rates.
